FOR BOYS AND YOUNG MEN.

This School has all the Advantages of a College with The Summerville Institute is patronized by the first Men of the South.

THIS old and highly useful and popular Institution enlarged, relitted and re-fur-

nished, and having the ablest corps of Teachers ever brought together in this country, will enter upon its Fourteenth Session on

Monday, the first day of October next. The Principal has associated with him in the School, John M. Puttick, A. M., W. R. Kirkpatrick, A. M., and Mr. T. J. Williams; Prof. P. E. Holmes gives instruction in Music every day with commendable zeal and ability. The School is situated in a high, salubrious region, known as the "Mountains," miles from Shuqualak, on the Mobile and Ohio Rajiroad, and is almost the only School, of its grade, that went through the war. Since the surrender, large additions have been made to the buildings, and the term closing June 30th is the most prosperous and useful one known in the history of the School, successful as it has always been. Every branch of Mathematics, pure and mixed, including Civil Engineering and Practical Field Operations with a splendid equipment, is taught with the very first ability. The classics and the French language form an important feature in the reg-ular course of study. All the English branches are ably and forcibly taught, including the

Natural Sciences, illustrated by a complete apparatus. In short, the greatest care is taken with the training of all boys, at any stage of their education. Young men are carefully in the regular Commercial Schools. The most frequent instruction given students is, to maintain their self-respect and be gentle-

them in every interest. The charges are, for Twenty weeks, One Hundred and Twenty-five Dollars, invariably in advance. Music, which is optional, Washing and Fuel-extra. To secure a room, or tor other particulars address, Gholson, P. O., Miss. THOS. S. GATHRIGHT.

THE FOURTEENTH ANNUAL SESSION of this Institution will begin on Monday, September 24th, under the same Principal, who has presided over it for the last ten years, who has presided over it for the last ten years, who will be assisted by a full corps of teachers, of large experience and proved efficiency. Its friends and patrons, to whom its high character, before the war, was known, may be assured that it has lost nothing of that character, but now, as heretofore, stands second to none in the thoroughness of its discipline and instruction. For the truth of this declaration, we deed only refer to its late closing exercises. struction. For the truth of this declaration, we seed only refer to its late closing exercises, which, by competent judges, were pronounced superior in excellence to any they had ever before witnessed. With its buildings put in thorough repair, (which is now in progress,) and furnished with every necessary convenience; with its extensive means of illustration and the successful experience of its teachers. we cannot too warmly commend it to those who, for themselves or others, would enjoy the benefits of an educational institution of the PROFESSIONAL.

mari7dtf NEW ORLEANS. FASSMANN'S PATENT IBON TIES! For Cotton Bales.

THE above cultrepresents three of the Button and three of the Buckle Tie as they appear on a bale of cotton.

The hoop for the button is punched with two soles at one end and fifteen at the other. The band has only to be drawn tight, the holes in the two ends to be brought together,—the two hole end on top— and the button inserted. One button will answer, with the Buckle Tie, one end of the hoop is fas-tened to one section of the Buckle, the other end is inserted in the other section, and simply showed through it under the other end as long as there is any slack. A bite on the buckle holds it securely to to its place. to its place.

The hoops are painted to prevent rust, and cut in lengths of 10, 10; and 11 feet. Ten feet are most generally used, but 10; and 11 are semetimes required for large bales. The buckles are fastened to the hoops, the buttons will be put up in small boxes.

The Weight is About 10 Pounds to the Bale of Cotton. The advantages of iron over rope for baling cotton are now universally acknowledged. It holds the bale in a much smaller compass; is applied and fastened with as much facility, both in the country pressing and the re-compressing at the sea ports; lessens immensely the risk from fire; is stronger, and its strength is not impaired by time and exposure as is that of rope. This last advantage has beed strikingly manifested during the war. Thousands of bales of Cotton have been lost by the rotting and breaking of Rope which could have been preserved if Iron hoops had been used. In addition to this, it can be furnished cheaper than Rope. The derangement of labor in the hemp growing States has reduced the supply of bemp to such an extent as to cause prices to rule unprecedently high: indeed a sufficiency for baling a mcderate cotton crop, cannot be relied on at any price.

I have arranged for the importation of a large quantity of the best English Iron, and have made arrangements with Messrs. Chambers & Latting for the undersigned. Fire Warden and Fire Inages.

The undersigned, Fire Warden and Fire Inspector of the New Orleans Insurance Companies, are of opinion that the Iron Tie affords greater protection against loss in case of fire than the old style of baling with rope.

J. YOUENES, Fire Warden,
JOHN ADAMS, Fire Inspector. I concur in the above,

ALFRED BELANGER,

Ex-Chief Engineer, Fire Department.

SHIP REPUGE, NEW ORLEANS, July 7, 1859. Passmann, Esq , Orleans Cotton Press: H. Fassmann, Esq., Orleans Cotton Press:

Siz: In January last I received from your Press 1089 bales of cotton, of which about 1000 were recompressed and bound with your new "Iron Tie." I can tafely affirm that the cotton so bound was received in better order than it generally comes from the Presses, that it stowed better, and enabled the ship to carry more than on any previous voyage!

The cotton when discharged from the ship in Liverpool, was in better order than the rope bound cotton; it is highly preferable for a ground tier, as dampness from the ballast has no effect upon it, for it is well known by practical men that dampoess will rot the rope bound. I can confidently recommend your "Iron Tie," as I took this lot for an experiment and carefully watched it both in loading and discharging.
